

If you have (high speed) access to the internet, we've got a WEB-BASED PROPERTY MANAGEMENT SYSTEM FOR YOU!

General Features

Although developed within the hotel/motel segment of the hospitality industry, Skyware is flexible enough to be used in any other hospitality environment. In hotels, a hotel room is a resource, a conference room is a resource and so on. Since Skyware allows you to define those resources, it can also be applied to other hospitality segments, be it Marina Slips (also renting of boats), RV Sites (also renting of RV's), or Conference Centers and Campgrounds.

- ☞ All Skyware software modules are seamlessly Integrated
- ☞ Free Upgrades (with one of our maintenance services)
- ☞ System Wide Archiving (Data never lost or deleted)
