Outlet - Restaurant Point of Sale

The Skyware Point of Sale System provides the hotel the flexibility to manage guest services without the need for an additional third party system. An intuitive user interface that is so simple, it requires zero training time from your employees. The menu flows effortlessly from screen to screen resulting in faster transactions and a shorter wait for your guests.

With optional customer facing displays, our internet based POS system gives immediate feedback and communication to the customer. Marketing and suggestively selling additional menu items no longer requires effort from your employees.

Features

- Cloud Based Management, Reporting, and Database
- Zero Training Time for Employees
- Configurable Menu Flow
- Conversational Ordering
- Touch Screen
- Integrated Payment Drawer Management
- Seamless Room Charge Posting

The Skyware Point of Sale System is built upon an integrated platform for seamless implementation and flexible scalability. Cloud based management and reporting gives you dynamic control on the go. From quick service to high-end restaurants, lounges to bustling bars, gift shops to pro-shops, our integrated POS software combines performance with ease of use. Skyware POS streamlines point of sale management through highly reliable, scalable, effective and flexible tools to manage your entire operation.

The Skyware POS is designed for speedy processing of any purchases made. Transactions may be cash, credit or transferred to the room. Taxes are fully configurable. The modules include detailed and flexible products, pricing, discounts, costs, receivables and suppliers. Receipts can be customized to your property. For cost-efficiency, the system may be run using a keyboard, a mouse or a touch screen terminal. Peripherals such as optic scanners, cash drawers and printers can also be used
